

and 21-25, drawn to a method for generating a secondary library of scaffold protein sequences with a library of primary sequences using a force field calculation.

Applicant is further required to elect a species pursuant to page 4, first paragraph *et seq.* of the Official Action. Applicant hereby elects the species of synthesis of secondary library. This species election reads on Claims 21-25 of elected Group I.

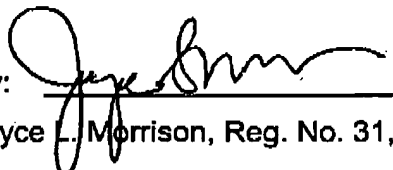

Applicants note that cancellation of the claims to the non-elected inventions does not change inventorship of the present invention.

Applicants reserve the right to file divisional applications on the non-elected groups.

Please direct any calls in connection with this application to the undersigned at (626) 737-8019.

Respectfully submitted,

Dated: July 29, 2003
